

FRONT SUSPENSION INSTALLATION TO SUIT TOYOTA HILUX DIESEL & PETROL MODELS

Part No. FK10 - suits Hilux models to 1988 - use 4 steel plates
FK11 - suits Hilux models 1988 on - use 2 steel plates

FITTING OF SPRINGS No. 91 (and 99) -

This subsection applies to all fitments of spring number 91 and those cases where spring number 99 is being fitted and distortion is greater than 2mm.

NOTE: The heavy cast seat in 1988 on models on RHS are quite robust and therefore reinforcement is usually only necessary on the LHS. However, it has been noticed that the RHS lower axle seat sometimes distorts when the U bolts are tightened, in these cases reinforcement is necessary on the RHS.
