

NM-NP Pajero Rhino Heavy Duty - Two Bar Trackmount System

 Important:
 Please read these instructions carefully prior to installation.

 Please refer to your fitting instruction to ensure that the roof racks are installed in the correct locations.

 Check the contents of kit before commencing fitment and report any discrepancies

Place these instructions in the vehicle's glove box after installation is complete. Parts List Maximum carrying capacity: 100kg Item **Component Name** Qty 2 Bar | 3 Bar | Part No. C393 Track End Cap (Left) 1 Pair 2 Pajero Track 1950mm A273 C394 3 Track Mount End Cap (Right) 2 4 Heavy Duty Rubber Buffer 1375mm 2 R004 5 Heavy Duty Crossbar End Cap 4 M002 Heavy Duty Crossbar 1375mm 2 6 A020 7 M6 x 35mm Button Security Screw 8 B092 8 M6 Spring Washer 8 W004 9 M6 x 12.5mm Flat Washer 8 W003 10 **RLTP Track Mount Leg** 4 M010 11 M6 x 21.43mm x 4.40mm Brass Nut 8 N009 12 M10 Channel Nut 4 N024 E56 13 M10 x 38mm Flat Washer 4 W022 M10 Internal Shakeproof Washer 14 4 W021 15 M10 x 25mm Hex Bolt 4 B071 19 16 Rivet H005 17 5mm Security Allen Key 1 SECKEY-S 18 Fitting Instruction 1 RR 127 **Care Instruction:** Clean vehicle roof prior to fitting Rhino Heavy Duty roof racks. **Tools Required:**

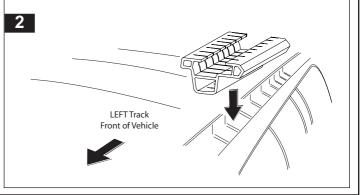

Pneumatic or concertina type rivet gun Marking pen Power or Cordless drill 5mm drill bit with depth stop Vacuum cleaner Cold galvanizing solution & brush Selleys Butyl Mastic 5mm Security Allen key, provided in kit 5/8 or 16mm spanner or socket wrench Measuring tape Hacksaw

Removal of roof trim. Grip rubber trim with fingers and carefully lift to expose the white plastic clips. Careful not to scratch the paint, slide clips sideways to unhook them from the roof channel, may need to use a screwdriver

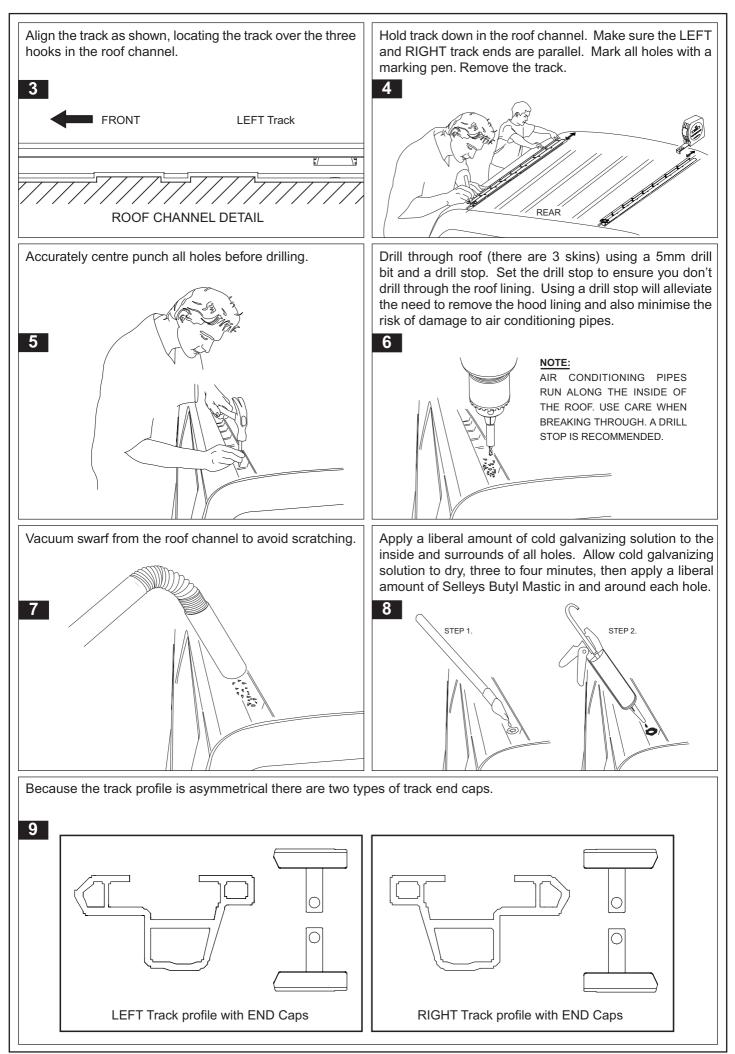

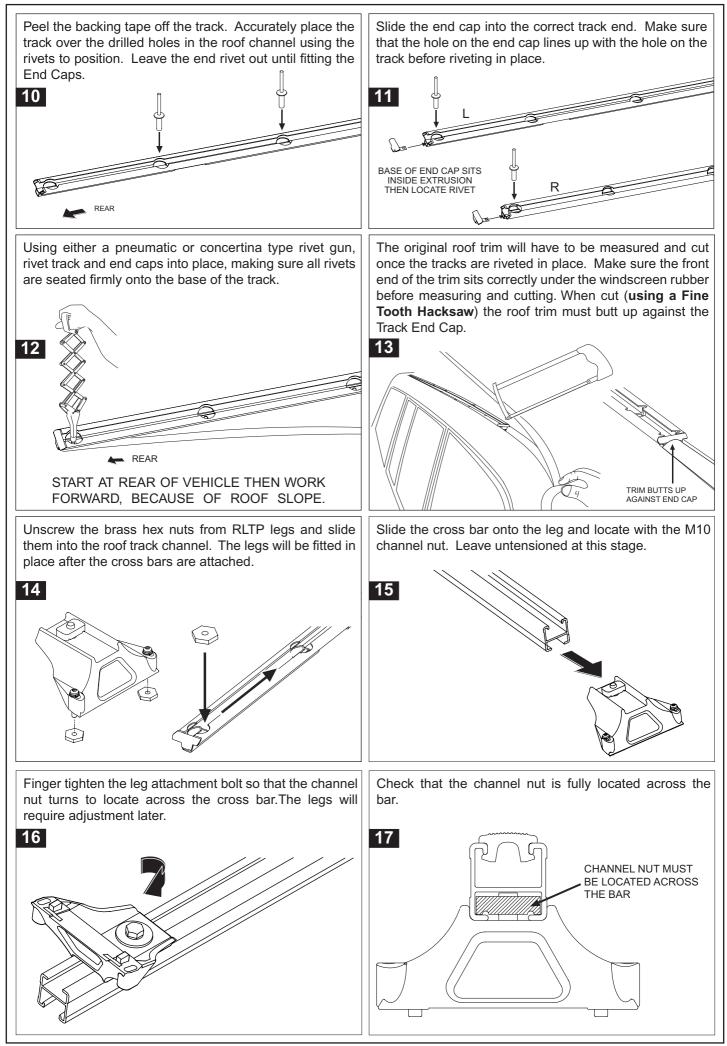

Once trim is removed clean out roof channel thoroughly before placing track in place. Roof Tracks are LEFT & RIGHT handed.

Important Information

Maximum carrying capacity: 100kg

Recommendations:

It is essential that all bolt connections be checked after driving a short distance when you first install your cross bars.

Bolt connections should be checked again at regular intervals (probably once a week is enough, depending on road conditions, usage, loads and distances travelled). You should also check the cross bars each time they are refitted.

Make sure to fasten your load securely. Please ensure that all loads are evenly distributed and that the centre of gravity is kept as low as possible.

Use only non-stretch fastening ropes or straps.

Sensitivity to cross winds, behaviour in curves and braking:

The handling characteristics of the vehicle, changes when you transport a load on the roof. For safety reasons, we recommend you exercise extreme care when transporting wind-resisting loads; special consideration must be taken into account when braking.

Please remove cross bars when putting vehicle through an automatic car wash.

Load Ratings:

Maximum permissible load is 100kg per pair of roof racks (include the weight of the cross bars, 5kg). When roof racks are to be used in off-road conditions, please build a safety factor of 1.5 into this load limit. Although the roof racks are tested and approved to AS1235-2000, Australian road conditions can be much more rigorous. However, increasing the number of cross bars does not increase the vehicles maximum permissible roof loading.

Note for Dealers and Fitters.

It is your responsibility to ensure instructions are given to the end user or client
